

SYSTEM AND METHOD OF ACHIEVING DYNAMIC CHANNEL BANDWIDTH

Abstract of the Disclosure

5

Fixed network equipment (100) initializes a channel aggregation strategy and establishes a default channel aggregation. A request for a service requiring additional bandwidth is received from a device. An updated channel aggregation is generated based upon the request and the channel aggregation strategy to create
10 an updated channel aggregation. The updated channel aggregation is signaled to at least one mobile station (116) via an in-band message.
